Vestigia

V0.0.1

Vestigia is a Hospital/Psychiatric hospital room booking system. This program aims to eliminate the hassle of calling every place to try and find an open room for a patient, only to find there isn't any openings open that are close to your area.

Options:

- Create an empty bed listing
    - Use this to create a bed listing
    - When prompted, type 1 and press enter.
    - After running, it will require 3 pieces of information
        - Bed ID
        - Bed Location
        - Contact Phone Number
    - Example
